

TubeTastic™ Oil Skimmer

Use with little or no access to the coolant sump from above, even in totally enclosed machining centers. Removes up to 1½ gallons of oil per hour.

Coolant Mints™

End that Nasty Rotten Egg Smell. One tablet maintains 25 gallons of coolant for an entire week.

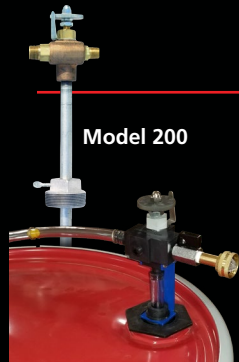

Mighty Disk™ Oil Skimmer

The compact, portable way to remove tramp oil from coolant and parts washers. Removes 1 gallon of oil per hour. Disk Skimmers are available in stainless, carbon and polymer.

CoolerCooler™ Coolant Refresher

Pumps out oil and refreshes coolant. Extends coolant life, reduces disposal costs, improves tool life and helps prevent dermatitis. Processes 1 gallon per minute.

Model 200

EconoMixer™

Accurately mixes coolant concentrates with water and dispenses the diluted solution. Both the Model 150 and the Model 200 offer a knob adjustment for dilution ranges of 15:1 to 45:1.

Model 150

Clean
Our
World!

Skimmerman™

Oil Boss®

Cleans oil from coolant by use of specialty filtration medium. Uses Magni-Cling™ technology to hang off machinery and save space.

L'il Blue Oil Skimmer™

Engineered Polymer. Removes one gallon or more of unwanted oil and coolant from parts washers.

Mighty Mini® SST Oil Skimmer

Compact and lightweight oil skimmer; fits almost anywhere. Stainless steel construction. Removes up to 2 gph of oil.

Ultra Mini

Smallest skimmer in the Abanaki lineup; can be mounted virtually anywhere. Can be wired directly to machine center or plugged into wall outlet. Removes up to 1 gph of oil.

Chiperator™ Coolant Strainer

Makes old coolant useable again. Filters 40 gallons of chips and coolant per minute.

Q-VAC 100™

Wet vacuum swiftly removes coolant from sumps, cleans up industrial spills. Processes 24 gallons per minute.

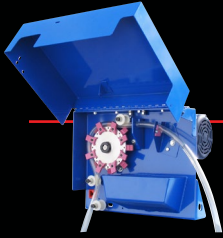

**Now available in an
Explosion Proof Model.**

Oil skimming is the lowest cost way to remove oil from water.

Abanaki, the world leader in oil skimmer products, manufactures a wide range of products to remove hydrocarbons from water. Proven in thousands of applications, Abanaki oil skimmers have a reliable, low maintenance design.

Oil Removal Product Shopper

Oil Viper™ Oil Skimmer

Removes floating surface oils by means of an oleophilic (oil attracting) 3/4 inch diameter continuous looped tube. The tube extends out over the surface of the tank or pit and collects the free floating oils.

Oil Grabber® Model 8

Abanaki's Flagship Oil Skimmer

Cleans wastewater in sumps, tanks and lagoons. Removes up to 40 gallons of oil per hour.

PetroXtractor®, Solar or Electric

Removes up to 12 gph of oil and hydrocarbons from groundwater using recovery monitoring wells.

Grease Grabber®

Designed for particularly extreme and demanding applications such as scale pits where heavy loads of grease and oil accumulate. Removes up to 160 gph of grease.

Oil Grabber® Model 4

OurThe Model 4 is designed for those applications where other models provide excess capacity, or physically will not fit. From a mere skimmer on top of water to a heavy oil slick, the Model 4 performs efficiently, removing up to 20 gallons of oil per hour.

Replacement Belts

Various belt materials and lengths available tailored to different applications.

Oil Grabber® Model MB

MultiBelt applications include truck washes, heat treating plants, oil refineries, and power plants. Our five belt model removes up to 200 gallons of oil per hour.

Tote-It™ Oil Skimmer

with optional removable trough

Preferred for tight spaces and portability. Can service multiple machines, sumps or wells in plants, mobile equipment service shops or at remediation sites. Removes up to 12 gallons of oil per hour from the fluid surface.

Oil Concentrator®

Add to skimmer for virtually complete oil/water separation for recycling or disposal.
